

A clean approach to public safety

Certificate of Envelopment Decontamination

Aircraft Tail Number: ABCXXX

Date: Jan 1, 2020

Time: 1500Z

The aircraft indicated above was decontaminated using the 'Envelopment Method' on the date indicated.

This methodology eliminates the human error factor associated with conventional cleaning techniques by enveloping the entire aircraft passenger and crew cabins in a fine mist of EPA-approved, hospital-grade disinfectant, reaching into every corner and covering all exposed surface areas.

Additional information and an illustrative video can be found at www.reliance.aero/disinfection

A handwritten signature in blue ink that reads "Ron Jordan".
