

PROJECT SUPPORT SOLUTIONS

RELIANCE
A E R O T E C H

"Through a relentless focus on the best people and more than two decades of experience, we provide flexible project support solutions our customers can depend on."

Ron Jordan
General Manager

Total Project Support Solutions

In addition to supporting our customers through basic staffing and recruiting solutions, Reliance Aerotech Services has extensive experience providing specific project solutions for customers in the business, government, military, and commercial aviation sectors. We support these projects by leveraging strong, well-established business relationships to access and deliver the necessary planning, management, and logistic expertise required to make your program a success.

If you have an emerging project needing a high quality solution, we invite you to contact us for a detailed analysis and proposal.

Past Performance

Reliance Aerotech Services has a proven track record delivering project teams for more than 1,000 aircraft systems and modification solutions for fixed and rotor wing aircraft in the military, government, business and commercial aviation sectors. From major avionics and structural upgrades to weapons and electrical systems, new engine test and delivery to training, we take the stress out of project delivery and program management, ensuring snags are appropriately anticipated, milestones are met, contract requirements are satisfied, and regulatory issues are fully complied with.

Reliance Aerotech Services has a broad range of program and project support experience including:

- Mobilization of personnel and equipment for turbine engine teardown, inspection, and reassembly in the Middle East
- Engine Flight Test Go-Team
- Establishment of turnkey delivery program at major aircraft manufacturing plants in multiple locations
- Delivery of modern wire-marking operation (equipment and operators at customer MRO)
- Numerous examples providing dedicated project teams to provide STC and/or field installs including the following work scopes:
 - > Multiple Fleet Onboard Wi-Fi system (GoGo)
 - > Aircraft Addressing and Reporting System (ACARS)
 - > Terrain Avoidance Warning System (TAWS) & Enhanced Ground Proximity Warning System (EGPWS)
 - > Tropospheric Airborne Meteorological Data Reporting (TAMDAR)
 - > Emergency Locator (ELT)
 - > Weather Radar
 - > Traffic Alert and Collision Avoidance System (TCAS)
- Extended-Range Twin-Engine Operational Performance Standard (ETOPS)
- Fire/Smoke Abatement System
- Regional Aircraft Cargo Conversions
- Aftermarket Install of APUs
- Dash-8 Rudder Isolation MOD
- Anti-Ice
- Structural Modification (Composite & Sheet-metal)
